OBJECTIVE

Software Engineer with experience developing scalable web applications and AI-driven solutions using MERN Stack, Next.js, and modern backend technologies. Graduated from IIIT Delhi in 2026 with a B.Tech in Electronics and Communication Engineering. Strong foundation in data structures, algorithms, and software engineering, with a passion for solving complex technical challenges and building products that create real-world impact.

EDUCATION

Bachelor of Technology (B.Tech), IIIT Delhi
Electronics and Communication Engineering (ECE)

November 2022 – July 2026

SKILLS

Languages	JavaScript (ES6+), TypeScript, C++, C, Java, Python, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
Backend	Node.js, Express.js, REST APIs, JWT Authentication, OAuth, WebSockets
Databases	MongoDB, MySQL, Firebase
Cloud & DevOps	Git, GitHub, Vercel, Render, Postman
Developer Tools	VS Code, IntelliJ IDEA, Linux, npm
Core CS	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

Software Engineer
V.Vang Solutions Private Limited

July 2026 – Present

- Developed and maintained multiple production-grade full-stack web applications using **React.js**, **Next.js**, **Node.js**, **Express.js**, **MongoDB**, and **REST APIs**.
- Led the complete **frontend and backend development** of the **KuberoPays** platform, implementing secure **JWT Authentication**, role-based authorization, merchant onboarding, transaction management, and payment workflows.
- Designed and implemented backend APIs for the **PayVang** platform, improving application scalability, maintainability, and overall system performance.
- Built and enhanced the **Merchant Portal**, delivering end-to-end full-stack features including authentication, dashboard analytics, payment management, and responsive UI for international merchants.
- Contributed to the development of the **CourseraEducation** platform by building scalable frontend components, backend services, and database integrations to improve user experience.
- Collaborated with cross-functional teams to integrate third-party payment services, optimize API performance, resolve production issues, and deliver features within agile development cycles.
- Followed modern software engineering practices including **Git**, code reviews, RESTful API design, modular architecture, and responsive UI development.

PROJECTS

- AdPromotion Platform** *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

- Developed a full-stack MERN platform connecting companies with cab drivers to manage vehicle advertisement campaigns through an admin-controlled system.
 - Implemented secure JWT-based role authentication with dedicated dashboards for Admins, Companies, and Cab Drivers.
 - Designed responsive React.js interfaces with filtering, modals, and real-time campaign management workflows.
 - Built scalable REST APIs using Express.js and MongoDB to automate advertisement request, approval, and assignment processes.
- **AI-Medicare** *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Twilio API*
 - Built a full-stack healthcare platform to improve medication adherence using the MERN stack and Twilio API.
 - Developed AI-powered voice call and SMS reminder workflows with scheduled notifications using Node-Cron.
 - Implemented secure role-based modules for Patients and Caretakers with medication tracking, adherence history, and real-time dashboards.
 - Integrated MongoDB and Mongoose for scalable data management and patient-caretaker relationship handling.
 - **Developer Portfolio Website** *React.js, Tailwind CSS, Framer Motion*
 - Designed and deployed a responsive personal portfolio showcasing projects, technical skills, and professional experience.
 - Implemented smooth animations, dark/light mode, and client-side routing to enhance user experience.
 - Optimized application performance and deployed the website on Vercel for fast and reliable access.

LEADERSHIP & ACTIVITIES

- Passionate about full-stack software development, building scalable web applications using the MERN Stack and Next.js.
- Regularly practice Data Structures & Algorithms on LeetCode to strengthen problem-solving and coding interview skills.
- Continuously explore AI, LLMs, and AI Agents by developing real-world applications and experimenting with modern AI frameworks.
- Maintain personal projects on GitHub and actively learn modern software engineering practices, system design, and cloud technologies.
